Crack Sealing

## Crack Sealing

*Extend the life of your asphalt!*

As part of a pavement management system, crack sealing can reduce pavement deterioration by restricting water penetration into underlying base and sub-base layers.

Sealing the cracks with a flexible rubberized asphalt that bonds to the crack walls and moves with the pavement will prevent water intrusion. Crack sealing is one of the most cost effective preventative maintenance options available.

Cornell Construction Limited specializes in sealing municipal and ICI properties.

### ADVANTAGES

- Extend pavement service life by preventing water from entering asphalt base, and sub base.
- Expands and contracts with pavement movement.
- Low cost effective pavement maintenance technique.
- Minimal traffic interruptions.
- Slows pavement deterioration.

### COMPLETE CRACK SEALING SERVICES...

- Clean and Fill.
- Rout and Seal.
- Hot air lancing.
- Hot pour crack sealing.
- Cold pour crack sealing.
